

## **Intellex Adds Development Team and IP, Spun Out from Maxim Integrated Products**

Santa Clara, CA, November 2, 2009 -- Intellex, the leader in Extended Capability RFID, today announced that they have reached a definitive agreement with Maxim Integrated Products (NASDAQ: MXIM) that will result in the transfer of a Maxim engineering team, a body of design works and related IP to Intellex in return for Maxim receiving an equity position in Intellex. In addition, Intellex and Maxim will partner on certain go-to-market activities in the future.

Intellex President and CEO Peter Mehring commented, "This transaction combines the leaders in Class 3 RFID. The added development capacity and complementary design ideas will allow us to accelerate the product road map and build a leading position in the applications and markets for Class 3 RFID technology."

Maxim Division Vice President Chris Neil commented, "The combination of these complementary teams creates a clear leader in this emerging Class 3 RFID technology. The Maxim team is leading the Class 3 world-wide standards definition and development, and the Intellex team is the leader in Extended Capability RFID product development. "

"We saw this spin-out combination as a natural fit that further strengthens Intellex's position," added Ketan Patel of New Venture Partners, who recently led a \$8M investment round in Intellex. "The Maxim team was doing great work on a parallel path with Intellex. By joining forces, they'll be able to move further, faster toward an impressive set of new extended capability RFID products for major market impact in 2010 and beyond." New Venture Partners LLC, is a global venture capital firm dedicated to corporate technology spinouts, with over \$700 million under management..

In total, seven engineers from Maxim will be joining the team at Intellex, and will be based in Dallas, TX and at Intellex's headquarters in Santa Clara, CA.

### **About Intellex**

Intellex is the leader in Extended Capability RFID solutions, products, and technologies. Its Intelligent RFID Platform, comprising high performance multi-protocol tags and readers, enables solutions for asset tracking, vehicle / yard management, manufacturing WIP control, supply chain automation, parts maintenance, access control, and other

applications. It features range, reliability, memory capacity, and security far beyond standard passive RFID, and at a fraction of the cost of active RFID solutions. For more information, please visit [www.intelleflex.com](http://www.intelleflex.com).
